Chapter 11. Dwelling profile and occupation

11.1 Introduction

This chapter of the Strategic Housing Market Assessment provides a profile of the dwelling stock across the Cambridge sub-region. The first section provides details of the dwelling stock by tenure, the second section deals with vacant stock. The third section looks at the type and size of stock including the number of Houses in Multiple Occupancy (HMOs) in each district. We then investigate overcrowding and concealed households. The final section looks at changes in dwelling stock, including a brief section on housing completions from 2002 onwards. Chapter 12, *Housing stock condition* separately outlines the information available and new data to be gathered on the condition of homes.

The first version of the SHMA provided data for 2005/6. This second version, launched in 2009, provides data for 2007/8 from districts' housing strategy statistical appendix (HSSA) returns. Census 2001 data remains unchanged.

11.2 Dwelling stock by tenure

Table 1: Dwelling stock by tenure, 2007/08

	Local Authority (including owned by others)	Registered Social Landlord	Other Public Sector	Private Sector	Total
Cambridge City	7,360	3,689	30	35,532	46,611
East Cambridgeshire	0	4,914	0	28,486	33,400

Sub-region	4.0%	11.1%	0.9%	84.1%	100%

Source: HSSA 2007/08

Tables 1 and 2 show the current dwelling stock by type. Private sector and other dwellings make up the largest percentage of stock - 84.1% for the sub-region as a whole and between 83-88% of the stock in most districts. Cambridge City has a smaller share of private sector stock and a larger share of social-rented dwellings (24%), which is higher than the national figure of 18%¹. In all other districts between 13% and 16% of stock is socially rented. East Cambridgeshire, Fenland, Huntingdonshire, Forest Heath and St Edmundsbury have all undergone Large Scale Voluntary Transfers. Fenland transferred its local authority stock to Roddons Housing Association in November 2007². In Cambridge City and South Cambridgeshire, the Local authorities manage most of the social rented stock, as shown in Fig 1. "Other public sector" dwellings include homes owned by hospitals and the armed forces. Although Addenbrooke's own some nurses accommodation, it is managed by an RSL and is included in this category. Property owned by the university is included in the private sector stock, as is the USAAF accommodation in Forest Heath.

The Census provides a split of tenure, which shows the number of private tenants and owner occupiers within the private sector stock, shown in Table 3. On the basis that the tenure split has not changed since 2001, Table 4 shows the number of dwellings by tenure.

Table 3: Percentage of dwellings by tenure, 2001

	Owner Occupied	Social Tenants	Private Tenants/ Other
Cambridge	53%	24%	23%
East Cambridgeshire	73%	14%	13%
Fenland	75%	14%	11%
Huntingdonshire	76%	13%	11%
South Cambridgeshire	75%	14%	10%
Forest Heath	62%	15%	24%
St Edmundsbury	71%	17%	12%
Sub-Region	70%	16%	14%

Source: Census 2001

Table 4: Dwellings by tenure, 2007/08

	Owner Occupied	Social Tenants	Private Tenants/ Other	All households
Cambridge City	24,704	11,187	10,721	46,611
East Cambridgeshire	24,382	4,676	4,342	33,400
Fenland	31,167	5,818	4,571	41,556
Huntingdonshire	52,887	9,046	7,655	69,588
South Cambridgeshire	44,226	8,256	5,897	58,378
Forest Heath	16,971	4,106	6,570	27,647
St Edmundsbury	32,938	7,886	5,567	46,391
Sub-region	226,721	51,822	45,344	323,887

Source: Census, HSSA 2007/08

Cambridge City has the lowest percentage of owner occupiers (53%) and the highest percentage of social tenants (24%) and a high proportion of private tenants (23%). However, Forest Heath has the highest percentage of private tenants/ other (24%). This may be because of the USAAF presence. In the 2007 survey of letting agents, one of the agents who responded dealt exclusively with this market. The 2008 survey also showed it to be a

¹ DLCC website, http://www.communities.gov.uk/embedded_object.asp?id=1504959

² The source of tables 1 and 2 is from the 2005/06 HSSA and the change has occurred since it was written. All tables referring to LA stock in Fenland will be updated in future iterations.

significant influence on the rental market in Forest Heath, but also in parts of St Edmundsbury and East Cambridgeshire. South Cambridgeshire has the lowest percentage of private renters (10%). This may be due to the area not having a major town and the private tenant preference for living as near as possible to the town centre (which in this case would mean the City, which as shown has a high percentage of private rented properties available). Huntingdonshire has the highest percentage of owner occupiers (76%) and the lowest of social renters (13%).

Table 4 (above) assumes the same tenure split as 2001, however this may not be accurate 8 years on. The percentage of private tenants may be higher now for two reasons:

- Homes are less affordable. If people can't afford to buy, they may rent instead rather than staying at home, especially as the average age of first time buyers has also risen.
- There has been a large increase in the buy-to-let market, which should mean there are more rental properties available.

Fig 1: Social Rented Stock by district, 2007/08

Source: HSSA

11.3 Vacant Dwellings

Table 5: Vacant dwelling stock, 2007/08

	Local Authority (including owned by others)		Registered Social Landlord		Other Public Sector		Private Sector		Total	
	Count	%	Count	%	Count	%	Count	%	Count	%
Cambridge City	161	2.2%	138	3.7%	0		72	0.2%	371	0.8%
East Cambridgeshire	LSVT		20	0.4%	0		987	3.5%	1,014	3.0%
Fenland	LSVT		45	0.9%	0		616	1.7%	661	1.6%
Huntingdonshire	LSVT		150	1.7%	166	17.6%	970	1.6%	1,286	1.8%
South Cambridgeshire	163	2.9%	33	1.4%	13	2.4%	1,433	2.8%	1,642	2.8%
Forest Heath	LSVT		16	0.4%	0		300	1.3%	316	1.2%
St Edmundsbury	LSVT		85	1.1%	0		996	2.6%	1,081	2.3%
Sub-region	324	2.5%	487	1.4%	186	6.7%	5,374	2.0%	6,371	2.0%

Source: HSSA, 2007/08

Just 2% of all dwellings in the sub-region are recorded as vacant. This is lower than the national figure, which is just over 3%. Vacancy rates were highest in East Cambridgeshire and South Cambridgeshire. "Other public sector" dwellings have the vacancy rate in the sub-region, mostly because of the high percentage of this stock that is empty in Huntingdonshire. Cambridge City and has the highest occupancy rates, particularly in the private sector. As a certain amount of vacant dwelling are required in order for stock to turn over, this may indicate a blockage in supply. Forest Heath also appears to have comparatively few vacant properties using this data.

11.4 Dwelling Type

Table 7: Dwelling Stock by type, 2001

	All	Detached	Semi-Detached	Terraced	Flat/Maisonette	Temporary Structure	Shared Accommodation
Cambridge City	44,024	4,992	12,176	13,994	12,044	70	748
East Cambridgeshire	30,585	13,579	9,935	4,869	1,870	303	29
Fenland	36,372	16,251	10,937	5,963	2,851	321	49
Huntingdonshire	65,124	27,008	19,743	12,017	5,821	434	101
South Cambridgeshire	53,584	23,110	18,453	9,068	2,257	659	37
Forest Heath	24,372	8,793	7,110	5,309	2,797	288	75
St Edmundsbury	42,200	15,351	11,290	11,241	3,914	287	117
Sub-Region	296,261	109,084	89,644	62,461	31,554	2,362	1,156

Source: Census, 2001

Fig 2: Dwelling Stock by Type, 2001

Source: Census, 2001

In most of the districts around 40% of the stock is detached houses or bungalows, with semi-detached the second most common type of property in most of the districts. Cambridge City

has a different profile from the rest of the districts with terraced houses being the most common type of property. There is also a larger percentage of flats than in the other districts. The city also has a large amount of shared accommodation and, comprises around 65% of this type of dwelling for the sub-region as a whole. Some data on shared accommodation is available by looking at the number of Houses in Multiple Occupancy (HMOs) in each district:

Table 8: Houses in Multiple Occupancy by district, 2007/08

	Total HMOs	As % of Total Dwelling Stock
Cambridge City	5,000	11%
East Cambridgeshire	99	0.3%
Fenland	500	1%
Huntingdonshire	500	1%
South Cambridgeshire	9	0.02%
Forest Heath	46	0.2%
St Edmundsbury	66	0.1%
Sub-region	6,220	1.9%

Source: HSSA 2007/8

In Cambridge City 11% of the total stock are HMOs, but the rest of the sub-region they make less than 2% of the total number of dwellings. This may be due to the student population although there may also be other groups that need to be investigated further. After the City, Fenland and Huntingdonshire have the second highest number of HMOs. This may be due to the migrant worker population.

While HMOs data provides some information on households in shared accommodation, it only includes larger properties i.e. three or more people in two or more households in the same dwelling. It does not include information on other types of shared accommodation such as people taking in lodgers. It is also probably not a complete data set and will require further research in the future. The definition of which HMOs need to be registered changed on 1st April 2007 and the numbers have increased significantly in most districts since 2005/06. Shared Accommodation, according to the SHMA guidance also includes communal supported schemes. Supported housing is examined in greater detail elsewhere in the SHMA, but Table 9 below gives an estimate of the number of units/bedspaces of supported housing in each district.

Table 9: Units of supported housing, 2006 by district

	Number of units
Cambridge City	1,273
East Cambridgeshire	1,228
Fenland	876
Huntingdonshire	1,261
South Cambridgeshire	1,699
Forest Heath	443
St Edmundsbury	1,145
Sub Region	7,925

Source: DataSpring 2006, Cambridge City Council and South Cambridgeshire District Council, 2007/8

There are nearly 8,000 bedspaces of supported housing in the sub-region. Scheme sizes vary significantly from small almshouses with less than ten bedspaces to large schemes such as the YMCA in Cambridge City, which has 150 spaces and also has a higher turnover because of its client group. Most of the supported housing in the sub-region is supported housing for older people.

Table 10: Occupied Dwellings by Number of Rooms

	All	1 Room	2 Rooms	3 Rooms	4 Rooms	5 Rooms	6 Rooms	7 Rooms	8 or more rooms
Cambridge City	42,658	1,152 3%	2,265 5%	4,912 12%	7,757 18%	10,176 24%	8,713 20%	3,503 8%	4,180 10%
East Cambridgeshire	29,780	117 0.4%	346 1%	1,806 6%	5,677 19%	7,573 25%	5,781 19%	3,260 11%	5,220 18%
Fenland	35,192	97 0.3%	595 2%	2,498 7%	7,814 22%	9,882 28%	7,193 20%	3,320 9%	3,793 11%
Huntingdonshire	52,152	208 0.4%	917 2%	3,880 7%	9,516 18%	16,865 32%	11,639 22%	7,911 15%	1,216 2%

Source: Census, 2001

The data in Table 10 provides information on the number of rooms (not including bathrooms and hallways) households have sole access to. Cambridge City has a large number of one and two-room properties when compared with the rest of the sub-region, which is because student accommodation. South and East Cambridgeshire are the districts with the highest percentage of dwellings with more than 8 rooms. Huntingdonshire and Forest Heath have very few properties of this size. Five rooms properties are the most common size in the sub-region. This is roughly equivalent to a three-bedroom house (three bedrooms, living room and kitchen).

Fig 3: Number of Rooms by Tenure, Sub-Region

Source: Census, 2001

By tenure, the most common size by number of rooms for social tenants is four rooms. It is five rooms for owner-occupiers and private tenants. Owner Occupiers have more rooms in

their homes than social and private tenants, (the private rented sector includes those living rent free), and 21% of owner-occupiers live in houses with 8 or more rooms. There are more private tenants in one or two room properties than social renters and owner-occupiers. There were very few social tenants in properties with seven or more rooms. An appendix provides a breakdown of the number of rooms by person and tenure for the sub-region as a whole.

11.5 Overcrowding

Table 11: Overcrowded households by districts

	Owner Occupier	Social Renter	Private Renter	All households
Cambridge	881	1,750	2,540	5,160
East Cambridgeshire	436	423	358	1,102
Fenland	628	553	443	1,442
Huntingdonshire	933	878	668	2,271
South Cambridgeshire	690	539	443	1,514
Forest Heath	439	440	478	1,174
St Edmundsbury	476	722	354	1,420
Sub-Region	4,484	5,305	5,284	14,253

Source: Census, 2001

Table 12: Overcrowded households by district (%)

	Owner Occupier	Social Renter	Private Renter	All households
Cambridge	3.9%	17.1%	25.9%	12.1%
East Cambridgeshire	1.8%	9.1%	8.3%	3.7%
Fenland	2.1%	9.9%	10.1%	4.1%
Huntingdonshire	1.8%	9.9%	8.9%	3.6%
South Cambridgeshire	1.6%	6.7%	7.7%	2.9%
Forest Heath	2.7%	11.2%	7.6%	5.1%
St Edmundsbury	1.5%	9.5%	6.6%	3.5%
Sub-Region	2.1%	10.9%	12.5%	5.0%

Source: Census 2001

The data in Table 12 is taken from the Census, which defines overcrowding according to the occupancy rating. In this case, the room requirement is calculated as follows:

A one person household is assumed to require three rooms (two common rooms e.g. one living room and a kitchen, and one bedroom).

Where there are two more residents it is assumed that they require a minimum of two common rooms plus one bedroom for

- Each couple.
- Each lone parent.
- Any other person aged 16 or over.
- Each pair aged 10-15 of the same sex.
- Each pair formed from a remaining person aged 10-15 with a child aged under 10 of the same sex.

- Each pair of children under ten remaining.
- Each remaining person either aged 10 to 15 or under 10).

While this is useful it does have weaknesses. For example, using this definition, one person living in a bedsit would be classified as living in overcrowded accommodation.

In the sub-region as a whole and in most of the districts, private renters are the most over-crowded group by tenure. In Forest Heath and Huntingdonshire social tenants are more over-crowded.

Cambridge City has the highest level of overcrowding in all tenures. 17% of social tenants and 26% of private tenants live in overcrowded accommodation. However, as can be seen from appendix 2, there are a larger number of people in one and two room properties in the City 19% of private renters were living in one or two room properties at the time of the Census, compared to between 4% and 6% in the rest of the sub-region.

The Survey of English Housing (SEH) also gives a figure for overcrowding. The SEH uses a different criteria for defining overcrowding – the bedroom standard. The standard number of bedrooms is calculated for each household in accordance with its age/ sex and marital status composition and the relationship of members to one another. A separate bedroom is allowed for

- Each married/cohabiting couple.
- Any other person aged 21 or over.
- Each pair of adolescents aged 10-20 of the same sex.
- Each pair of children under 10.

Any unpaired person aged 10-20 is notionally paired if possible with a child under 10 of the same sex or if that is not possible (s)he is allowed a separate bedroom as is any unpaired child under ten. This standard is then compared with the actual number of bedrooms available for the sole use of the household (including bed-sitters).

SEH figures are not available at a district level. Table 13 shows the regional figure for the East of England is applied to each district by tenure.

Table 13: Over-crowding according to bedroom standard

	Owner Occupied	Social Rented	Private Rented/ Other
East of England	1.1%	5%	3.9%
Cambridge City	258	530	396
East Cambridgeshire	269	235	170
Fenland	321	272	167
Huntingdonshire	563	438	289
South Cambridgeshire	478	434	226
Forest Heath	174	195	243
St Edmundsbury	336	366	201
Sub-region	2,399	2,470	1,693

Source: SEH 2007/08, Census 2001, CCCRg household estimates, (CLG household estimates for Suffolk)

According to the SEH, 5% of social rented dwelling in the East of England are overcrowded, as are 3.9% of private rented properties and 1.1% of owner occupied homes. If this is applied to the different districts in the sub-region, the figures for over-crowding are up to 5 times lower, as shown in Fig 4. This is different to the Census data based on occupancy

rating where renting privately is the most over-crowded form of tenure, as it does rate bedsits (occupied by single people or couples) as not being over-crowded.

11.6 Concealed households

Concealed households are adult households living with parents, friends or other relatives. They may not have an immediate need to move, but are not suitably housed – the family accommodation may be overcrowded. They are also vulnerable in disputes with the main household as they do not own or rent the property. Such households may be living in this situation due to a lack of affordable options.

The household survey in Cambridgeshire specifically asked questions to find out about the number of homes containing concealed households. These data are presented in Table 14.

Table 14: Concealed Households across Cambridgeshire

	Number	Percentage
Cambridge	562	1.29%
East Cambridgeshire	890	2.73%
Fenland	291	0.77%
Huntingdonshire	1341	2.02%
South Cambridgeshire	457	1.07%

Source: Cambridgeshire Household Survey, 2007

According to the survey, East Cambridgeshire had the highest percentage of concealed households (2.73%) in the county and Fenland had the lowest (0.77%).

Ⓡ It is difficult to count concealed households because they are considered. However, we believe it is possible to estimate how many there may be by looking at the types of concealed households. In future we will extend the SHMA to Forest Heath and St Edmundsbury to gather comparative information.

11.7 Change in Dwelling Stock 2001-2008

Table 15: Change in Stock 2001/02-2007/08

	Total Dwelling Stock 2001/2	Total Dwelling Stock 07/08	Difference	Change	Social Rented Stock 2001/02	Social Rented Stock 07/08	Difference	Change
Cambridge City	44,275	46,611	2,336	5%	10,951	11,049	98	1%
East Cambridgeshire	31,100	33,400	2,300	7%	4,510	4,914	404	9%
Fenland	37,361	41,556	4,195	11%	5,006	5,196	190	4%
Huntingdonshire	65,177	69,588	4,411	7%	8,996	8,637	-359	-4%
South Cambridgeshire	54,483	58,968	4,485	8%	7,210	7,932	722	10%
Forest Heath	24,632	27,373	2,741	11%	3,401	3,627	226	7%
St Edmundsbury	42,924	46,391	3,467	8%	7,236	7,393	157	2%
Sub-region	299,952	323,887	23,935	8%	47,310	48,748	1,438	3%

Source: HSSA 2001/02 & 2007/08

The total housing stock has increased in all areas in the last five years by between 5% and 11%. Social stock has seen a smaller increase across the sub-region – only 3%. In Huntingdonshire, it has decreased by 4%, but there has also been an 10% increase in South Cambridgeshire, and a 9% increase in East Cambridgeshire. This decrease is due to comparatively high numbers of Right to Buy Sales (626) in the early years of this period. The

figures available from source for social stock are only for the social rented sector – other affordable options such as shared ownership are included in the private sector figures.

Source: Cambridgeshire County Council, EERA

Just over 28,000 houses have been built in the sub-region in the past seven years and about 5,100 (18%) of these new houses were affordable, i.e. either for social rent or other options such as shared ownership. There is a target for the sub-region of 40% new affordable homes. It also includes key worker affordable housing, which if intermediate rented would

usually be included as “other public sector” dwellings in HSSA derived tables. Figures for the Cambridgeshire districts are net and include demolitions/conversions. There is no data available on demolitions for the Suffolk districts, so these data are gross rather than net. There is no data available for 2007/08 for these districts, but it will be added when it becomes available.

11.8 Conclusions

There are nearly 316,000 homes in the Cambridge sub-region and most of the housing stock is in the private sector. There has been a 8% increase in total stock during the past five years, and a 3% increase in social rented stock. Decreases in social stock in Huntingdonshire are due to a high number of RTB/RTA sales compared to the building rate.

Detached properties make up the largest share of properties by type in the sub-region, and there are comparatively few flats. This profile is different for Cambridge City, which has a higher percentage of flats and terraced properties and very few detached houses.

There are just over 6,200 known HMOs in the sub-region, most of which are in Cambridge City, but more research is needed to understand this part of the market and other shared properties. This number has increased by 34% since 2005/06 largely due to an expansion of the definition of properties classed as HMOs.

There are just under 8,000 supported housing units, most of which is for older people and scheme size varies considerably depending on scheme type and client etc.

In the sub-region as a whole 2% of properties are currently empty.
